

Bespoke Travel Services

Seamless, private astronomy woven into the vacation you've already planned

The Idea

Keep your itinerary exactly as it is, dinners, villas, sails, spa days. We arrive quietly where you are and transform one evening (or several) into a private observatory experience. With observatory-grade instruments and an expert host who speaks in stories, not jargon, you and your guests will see the universe with clarity and ease, without lifting a finger.

Design

Share your route and dates. We map the best night(s) and location(s) for your sky, then curate a short list of celestial targets tailored to you.

Activate

Our team stages a discreet, beautiful setup at your villa, yacht, terrace, desert camp, or rooftop, solar by day (optional), deep sky by night.

Savor

You look, listen, and linger. We host, guide, and pace the evening to your preferences. Optional keepsakes commemorate the night.

What You'll Experience

- **A night that becomes the highlight:** galaxies, nebulae, star clusters, the Moon and planets rendered with breathtaking detail.
- **Hosting that meets you where you are:** quiet, refined, and deeply knowledgeable; equally suited to family curiosity or sophisticated conversation.
- **A setting that stays elegant:** equipment chosen to match your aesthetic and disappear into the scene.

Options You Can Add

Signature Night Under the Stars

Our most requested format.

Daylight Solar Viewing

Safe, spectacular views of prominences and sunspots; perfect for families and executive windows.

Private Astrophotography & Keepsake Images

The perfect pictures to memorialize your journey.

Heirloom Meteorite Gifting

Authentic lunar/Martian specimens curated as rare, provenance-rich mementos.

Why Travelers Love It

No itinerary overhaul: we fit the experience to your schedule, not the other way around.

Private and personal: a tailored evening that feels like it was designed just for you (because it is).

Memorable by design: an extraordinary finish to a beautiful day, the story everyone tells when they return home.

Discretion, Always

Privacy is a first principle. We keep a low profile, never post without permission, and are NDA-friendly. Our presence is polished, quiet, and respectful of your space.

What We Handle vs. What You Do

We handle:

Planning, logistics, instruments, transport, setup, hosting, guest flow, and teardown.

You do:

Choose the date, open a bottle, step to the eyepiece.

Invite the cosmos in. Allow us the distinct honor of integrating a private astronomy evening into your journey. Share your dates and destination, and we'll design the night you'll remember first.
